EDUCATION

Virginia Tech, Blacksburg, VA

Graduation: May 2024

- *Bachelor of Science, Management Consulting and Analytics*

J. Sargeant Reynolds Community College, Richmond, VA

Graduation: May 2020

- *Associate of Science, Business Administration*

TECHNICAL EXPERIENCE

Wells Fargo, *Software Engineer*, Charlotte, NC

July 2024 – Present

- Acted as a liaison between engineering, QA, and product teams to define API specifications and system interfaces in alignment with strategic business requirements.
- Supported the delivery of scalable, service-oriented solutions by contributing to the planning and documentation of backend services, including API contracts and system integration points.
- Collaborated on the planning, specification, and testing of enterprise APIs, ensuring alignment with business objectives and cross-team integration requirements.
- Worked within Agile frameworks to manage backlog priorities, track progress, and ensure timely delivery of features in fast-paced release cycles.
- Assisted in writing technical documentation and supporting artifacts to improve onboarding and knowledge transfer across teams.
- Facilitated Agile ceremonies and contributed to sprint planning, backlog grooming, and cross-functional team alignment to drive timely and efficient product delivery.
- Partnered with senior engineers and product owners to document requirements, define scope, and support prioritization of features based on business value and technical feasibility.

Wells Fargo, *Software Engineer Intern*, Charlotte, NC

June 2023 – August 2023

- Deployed Java, Spring Boot, and the principles of microservices architecture in the development of a crucial internal financial platform, including a robust API gateway microservice to ensure efficient and secure data exchange.
- Used Angular to create a dynamic and responsive front-end for the financial platform, enhancing user interaction and overall usability.
- Expedited ETL processes, promoted code reusability, and assisted in the phased decommissioning of legacy mainframe systems.
- Adopted Agile SDLC, with multiple iterative sprints, to proactively develop and refine software components in a microservices environment for an important financial project, enabling quick feedback loops and continuous improvement.

VTHacks IX at Virginia Tech, *Best Use of DeSo Hackathon Category Winner*, Blacksburg, VA

February 2022

- Guided a 3-member team in the development of Glovera, a blockchain-based crowdfunding platform.
- Executed successful deployment of Glovera on the DeSo Blockchain with integrated Web3 identities, all within a rigorous 36-hour sprint.
- Leveraged Lucid for wireframe design, accelerating UI/UX development process by 30%.
- Constructed a dynamic frontend using JavaScript, HTML, CSS, supplemented SQL database integration.

LEADERSHIP EXPERIENCE

Blockchain at Virginia Tech, *Co-Founder*, Blacksburg, VA

October 2021 - Present

- Grew club to over 150 members, creating hub for blockchain exploration, knowledge exchange, and hands-on learning.
- Led a leadership team of 20, overseeing the strategic coordination of club activities, decision-making processes, and overall vision.
- Formed strategic partnerships with top-tier Ivy League and CS schools, introducing a wide range of collaborative events to share insights and promote a greater understanding of blockchain technology.

TECHNICAL SKILLS

- *Programming Languages*: Python, Java, JavaScript, C++, SQL, R
- *Frameworks and Libraries*: Spring Boot, Angular, React, Node.js, Bootstrap, Tailwind, MaterialUI, Hadoop, NumPy
- *Tools*: Git/GitHub, VS Code, IntelliJ, Eclipse
